LEAD FIELD SKETCHING & NATURAL HISTORY FIELD STUDY TRIPS

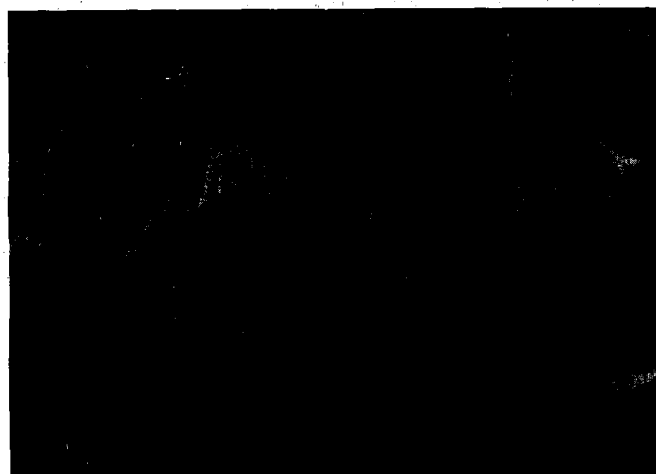

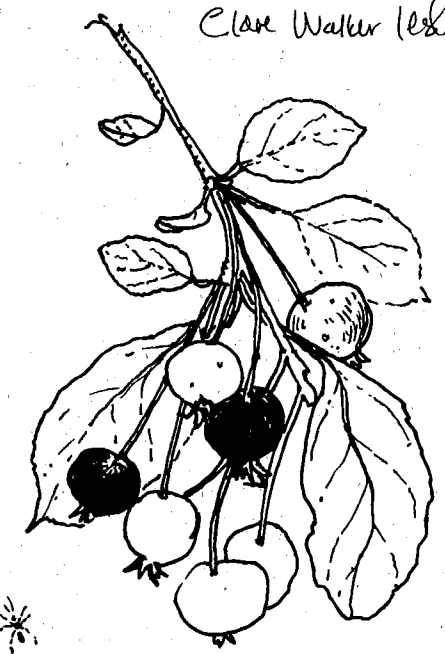

• Available now for programs. Fee schedule on request.

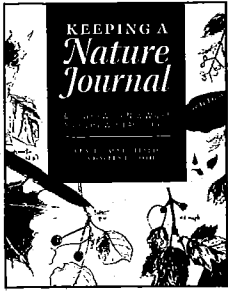

*"Nature journaling creates a way for students to record directly what they notice in the outdoors right around them, in any season."
 - a fifth grade teacher*

*"You have taught me to see nature more carefully and more lovingly. I may never be terrific at drawing but now I have another way of connecting with nature."
 - letter from a student*

"I want to help people connect better with nature and its processes. My methods are simple and students progress rapidly, often overcoming large blocks with drawing. They become excited in discovering a way to explore and observe nature, using only paper, pencil, and a quiet eye."
